INTRODUCTION

The test-prep division of Nova Press was founded to provide students with comprehensive, rigorous books, software, and online courses to prepare for college entrance exams.

We believe that the best way to prepare for college entrance exams is to approach them as you would an academic subject. Hence, our products thoroughly and systematically analyze the subject matter of a test. For instance, the LSAT is based on logic. Therefore, our book *Master The LSAT* presents a comprehensive analysis of the principles of logic needed for the LSAT.

College entrance exams cannot be "beaten." But they can be mastered—through hard work, analytical thought, and training yourself to think like a test writer.

Our test-prep products introduce students to numerous analytic techniques that will help them immensely, not only on the tests but in school as well. For this reason, studying for college entrance exams can be a rewarding and satisfying experience.

Many top colleges, high schools, and test-prep companies use Nova Press test-prep books, software, and online courses in their classes.

Some of the schools using Nova Press materials:

- BYU
- Drexel
- University of San Diego
- University of Delaware

Everything you need for test prep, in one place!

Whether you need books, software, phone apps, or online courses, Nova Press has everything you need to run a successful test-prep course. Further, our licensing program allows you to modify the material as you need and to brand it with your company's name.

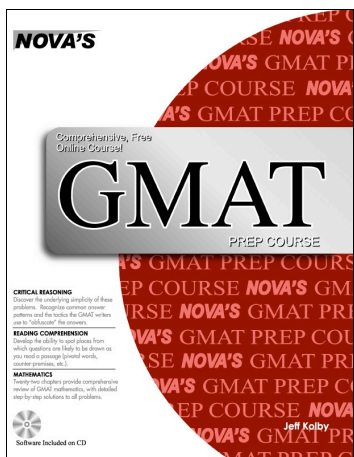

BOOKS

Are you frustrated with test-prep books that tend to trivialize the tests—spending as much time teaching students how to guess the answers as discussing the concepts and skills that are being tested?

College entrance exams are challenging and students need comprehensive, rigorous books to prepare them for the tests.

Comprehensive, Rigorous Prep for the GMAT!

Although the GMAT is a difficult test, it is a very learnable test. GMAT Prep Course presents a thorough analysis of the GMAT and introduces numerous analytic techniques that will help students immensely, not only on the GMAT but in business school as well.

- **Math:** Twenty-two chapters provide comprehensive review of GMAT math.
- **Logical Reasoning:** Discover the underlying simplicity of these problems and learn the tactics the GMAT writers use to obfuscate the answers.

Testimonials:

- "Your test prep course was very helpful to our latest group of students. It's by far the best test prep package in the field."

— David King (Associate Dean and Associate Professor of Law, Quinnipiac College, School of Law, Hamden, CT)

- "The other test prep software packages do not break down the material into the component parts necessary to truly understand the test. Your test prep software does. It is certainly the clearest and most logical test prep software written for the LSAT. On my first LSAT, I received a 151. This time I used your test prep software, and I received a 160. This apparently is a very rare increase—accomplished by less than 10 percent of LSAT repeaters. I owe a great deal of this improvement to your test prep software."

— Ed Geil (student)

- **Math:** Seventeen Lessons, with exercises, provide comprehensive review of SAT math properties, including the new concepts from Algebra II.
- **Reading Comprehension:** Develop the ability to spot places from which questions are likely to be drawn as you read a passage.
- **Writing:** Comprehensive analysis of the new SAT Essay, including writing techniques, punctuation, grammar, rhetoric, and style.

The retail price of each software product is \$29.95, and volume discounts are as follows:
